These very large beetles are in the genus *Dynastes*, which is found throughout the Americas. Tropical species are among the largest insects in the world. In the United States, *Dynastes* beetles are generally uncommon, although the beautiful, black-spotted eastern Hercules beetle, *Dynastes tityus*, is occasionally found in large colonies on trees. These insects are harmless despite their large size ...

Beetle Identification and Guide to 21 Common Types | Owlcation

Beetles are a group of insects that form the order Coleoptera, in the superorder Endopterygota. Their front pair of wings are hardened into wing-cases, elytra, distinguishing them from most other insects. The Coleoptera, with about 400,000 species, is the largest of all orders, constituting almost 40% of described insects and 25% of all known animal life-forms; new species are discovered frequently.
