Ap Biology Lab 11 Answers

Lab 11 Animal Behavior Introduction: Ethology is the study of animal behavior. An animal's behavior is its response to sensory input. There are three types of behaviors: orientation, agonistic, and mating. Orientation behaviors take the animal to its most favorable environment. Taxis is when an animal moves toward or away from a stimulus. ... Continue reading "Lab 11a Behavior Ap"

The AP college board lists 13 labs for its recommended curriculum, however, teachers are not limited to only using their versions of the lab. AP biology teachers submit a curriculum for review and approval and must include laboratory exercises that align with their core ideas. Some of the recommended labs may be too expensive or too time consuming for your class.

This lab strongly relates to the major theme of AP biology of evolution. When plants shifted from living in an aquatic environment to living on a terrestrial environment it was a large evolutionary shift. Because of the shift from water to land, the plants had to overcome many challenges to survive.
