What Are the Symptoms of a Thrown Rod in a Riding Lawn Mower?

The lawn tractor's engine tries to burn the oil, present in large enough quantities that the smoke turns black instead of white. An overfilled oil compartment is one cause of oil backing into the...

Why Is My John Deere Tractor Spitting out Smoke? | Home ...

Your lawnmower may start burning up oil faster as the oil level recedes. This is due to decreased lubrication in the crankcase, which increases the temperature inside the engine. As the engine heats up, it will start burning oil faster as it will need to keep the cylinder walls, bore and crankcase adequately lubricated.

Causes of a Lawnmower Burning Oil | Hunker

Your engine may have old gas in the tank. Fuel in the last couple of years now has up to 10% ethanol. This ethanol attracts moisture (water) and debris which reduces fuel quality and may cause the engine to run rough (or not at all). Draining your fuel tank and carburetor is a good place to start.
