Probabilistic Method/Monte Carlo. An alternative method for managing the risk in a project schedule is to create a probabilistic model of the project schedule, where activity durations are not described by unique values, but rather by probability distributions.Monte Carlo simulation is a process that generates random values for inputs that are processed through a mathematical model in order to ...

### Use Monte Carlo Simulation to Manage Schedule Risk

A Monte Carlo schedule simulation provides a project's decision-maker with a scope of possible results and the probabilities each outcome might happen. It gives you the extreme possibilities—the results of going-for-broke and for making more conservative decisions—along with all possible ramifications for middle-of-the-road decisions.
