We don't know for sure that space never ends. It seems most likely that either space goes on forever or that it wraps back around on itself like a circle. Everything we know about the universe tells us that space is pretty flat, but that just means that if space is like a circle it must be a really huge circle, so huge that the part of it we can see is just a tiny piece.

Thankyou for all the kind words, I don't think I'm going to be able to get a update in tonight.. I spent all last night fixing a issue in the dark and cold and I've just got home at almost 11pm and I've noticed a few symptoms of what it was doing before.. for the last few miles I had been leaning out the window like a Labrador listening for any noise.
