User's Manual - cdn-10.nikon-cdn.com

Nikon recommend using Nikon branded Speedlights with Nikon digital cameras and does not undertake testing of flash units and accessories from other manufacturers. Nikon cameras comply with ISO10330 which is a international standard for cameras when used with flash units, failure to comply with this standard could cause damage to your camera and may void your Nikon warranty.

Nikon Speedlight Compatibility Chart

When you put your speedlight into TTL mode and hold the camera shutter button halfway down, it puts out an almost unseen flash of light or “pre-flash”. Your camera’s metering system picks up the reading from the pre-flash and signals to the speedlight approximately how much power to put out to get a correct exposure.

Quickstart Guide to Speedlights | Expert photography blogs ...

SB-600 or another Nikon Speedlight compatible with TTL auto flash to the COOLPIX. Auto flash operation is possible by setting the SB-600’s flash mode to TTL auto flash. The flash output level is controlled by detecting signals from the camera to determine when to start and stop firing in sync with the built-in flash, which is controlled by the camera’s non-TTL auto flash operation.

Nikon Speedlights can pivot, rotate and even be positioned off-camera, allowing light direction and intensity to be completely controlled. Greater Distance External flashes can illuminate subjects up to 98* feet away, nearly 3 times further than your camera's built-in flash.

Speedlight Camera Flashes | Nikon

Buy any Nikon flash (Speedlight) made in the last 15 years with a TTL setting and it will work perfectly with any modern or old Nikon film camera. The only real difference between flashes is how far away you can get and still have enough light. Honest, all the other features are meaningless for practical photography.
