This was one of the first preamps to have a vacuum-tube direct coupled output (and certainly influenced the introduction of our MP-1 preamp, which had/has a balanced direct-coupled output in 1989). FWIW, the MP-1 was the world's first balanced line preamp, being fully differential throughout, and pretty much introduced balanced line operation ...

### **Studio Academy**

Many stompbox preamps work with the magnetic pickups found on most electric basses, but using these preamps with piezo-pickup-equipped basses can be a problem. The output impedance of a piezo pickup is often too high to match the input impedance of an amp designed for the magnetic pickups of an electric bass.
