What Is Capital Budgeting? The term capital refers to the funds employed to finance fixed assets used in production; a budget is a detailed plan of projected inflows and outflows over future periods. Capital budgeting is the process of planning expenditures that generate cash flows expected to extend beyond 1 year. The choice of 1 year is arbitrary, of course, but it is a convenient cutoff for distinguishing between classes of expenditures.

Capital Budgeting Definition

CAPITAL BUDGETING DECISION RULES - Managerial Economics. An economically sound capital budgeting decision rule must consistently lead to the acceptance of projects that will increase the value of the firm. When the discounted present value of expected future cash flows exceeds the cost of investment, a project represents a worthy use of scarce resources and should be accepted for investment.
