Was Earth Ever Completely Underwater? In answer to the initial question posed in this article, yes, there was almost certainly a period of time when the vast majority of Earth was covered in water. Early estimates of this waterworld period of Earth's history was about 2.5 billion years ago, but recent research has pushed back that estimate by another 500 million years.

Was The Earth Ever Totally Underwater? » Science ABC

Based on research by NASA Astro-Biologist and Paleontologist Professor Peter Ward and a group of respected American climatologists, Earth Under Water is an eye-opening documentary uses scientific evidence past and present, archive footage, location photography and CGI to explore the terrifying consequences should the atmosphere's CO2 levels treble over the next 100 to 300 years, as predicted.

Earth Under Water (2010) - IMDb

Underwater Earth commenced work back in 2010 with a simple, single-minded vision - to reveal the ocean to the world. The ocean, representing over two-thirds of the world's surface area, critical to the planet's health and wealth, is out of sight and therefore out of mind. How can anyone love and care for something they cannot see and cannot understand.
